Training Providers Offering Accredited Lead Courses in North Carolina

Listed below are the names of approved Lead-Based Paint training providers from which the Health Hazards Control Unit (HHCU) regularly receives certificates for certification purposes. Additionally, the HHCU has limited reciprocity agreements with the Alabama, Georgia and Mississippi lead-based paint programs and may accept training for certification from those training providers accredited by Alabama, Georgia or Mississippi's state authorized programs. Because reciprocity agreements are subject to change, it is strongly recommended that you contact the HHCU **before** taking training from any source not included on the North Carolina list below. This will ensure the training is acceptable for North Carolina certification.

AAA Environmental, Inc. (Supervisor Initial)
