

Technology Based Outreach

Steve Beagle
UNC Field Coordinator
NC Department of Health and Human Services
Communicable Disease Conference
Wednesday, April 5th, 2017

Public Health and Technology

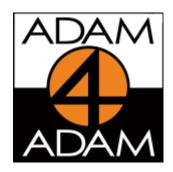

- 7/10/2000: DIS; Wake, Durham, Johnston, Chatham, and Lee counties
- Early 2000s: TDY in Region 7 (Wilmington); Columbus county syphilis
- 2006: Field Services Unit began emailing contacts to syphilis and HIV
- 2009: Social Media and Adult Websites
- 2012: Text Messaging and Smartphone Apps

Mid-Late 2000s

Modern Day Smartphone Apps

craigslist

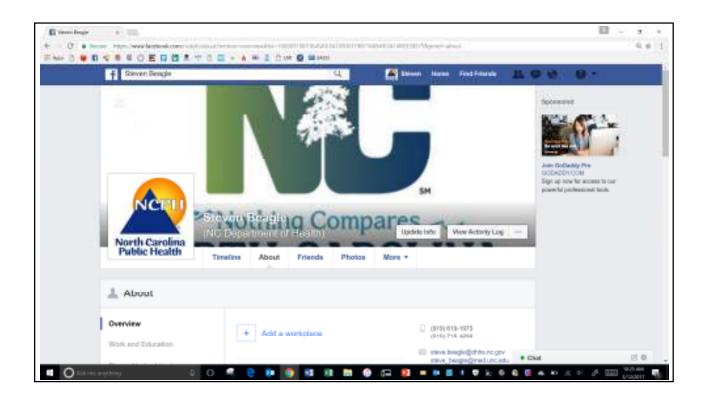

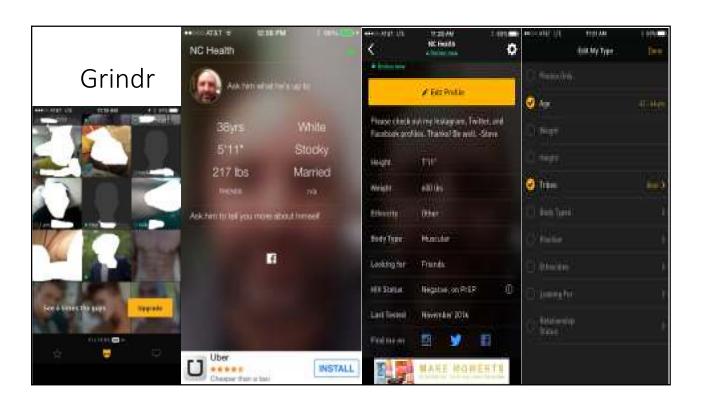

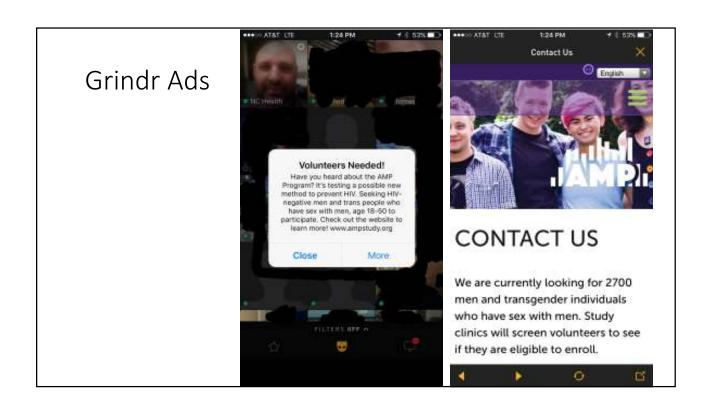

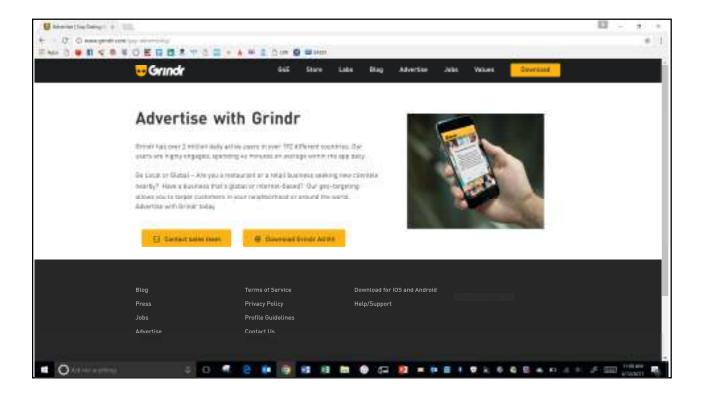

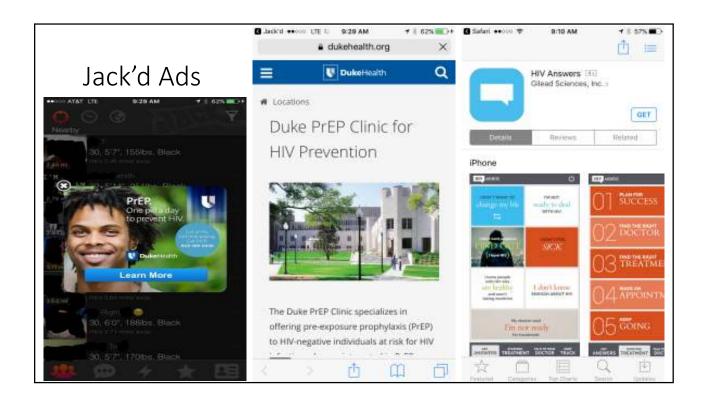

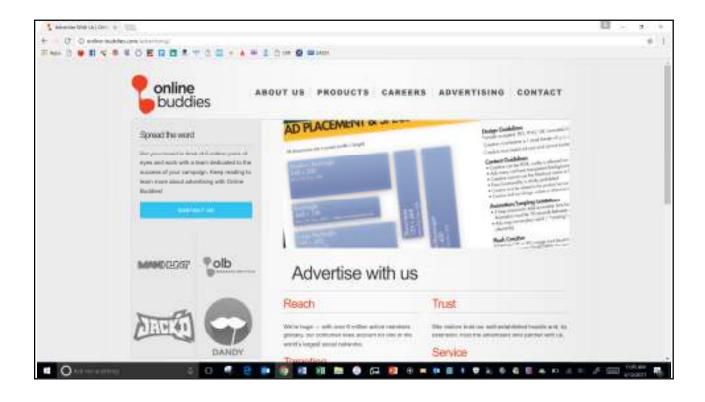

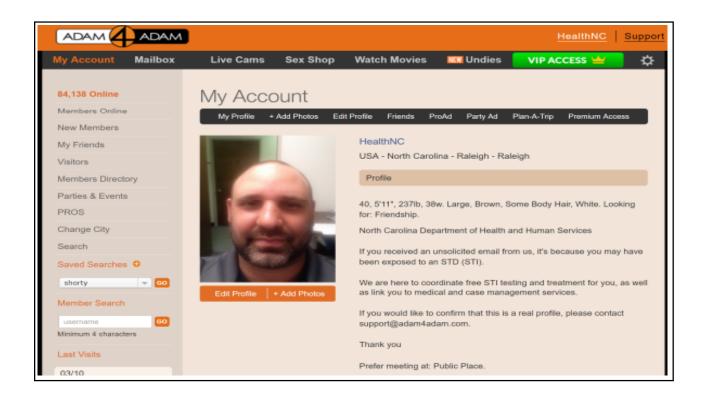

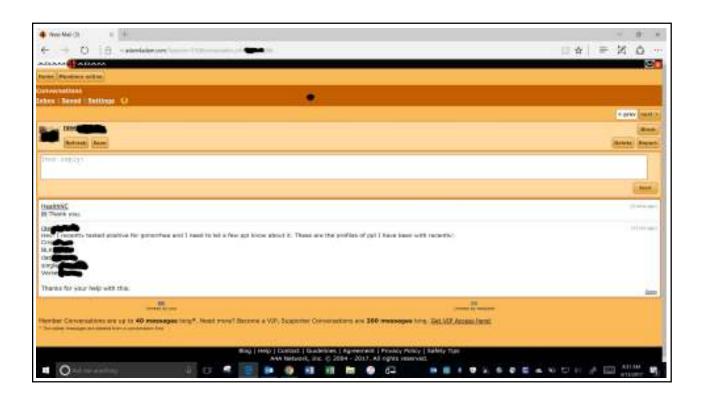

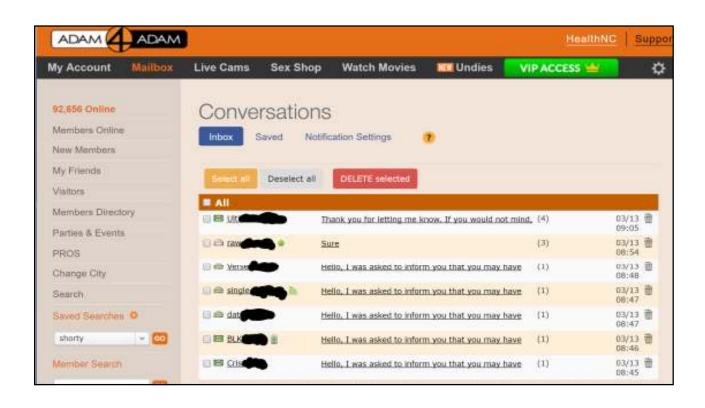

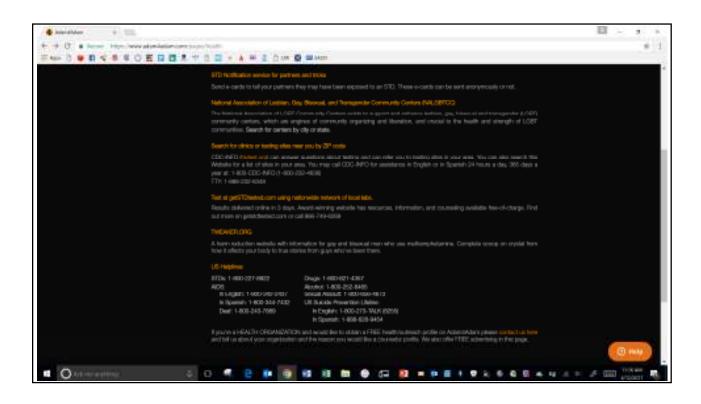

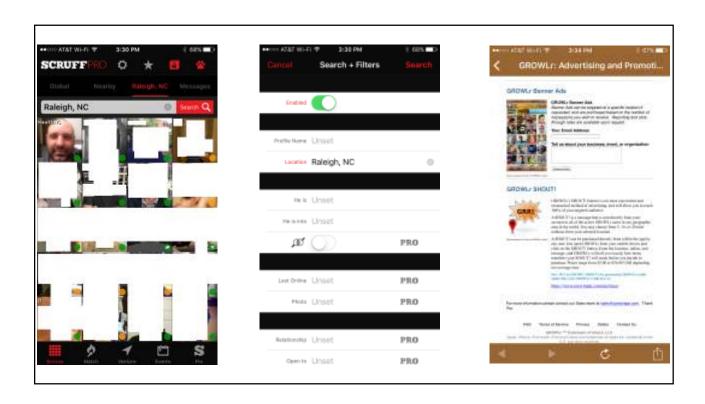

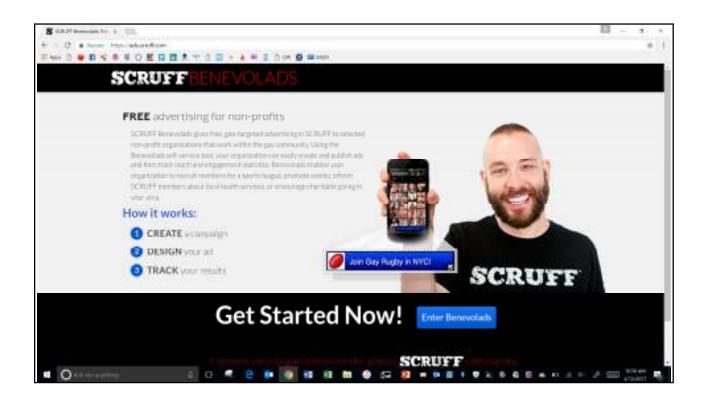

What can your health department do?

- Collect **email** addresses from clients when they register for services
- Ask your clients if you can email or text them (if able to obtain a device)
- Ask clients if you can message them through Facebook if you cannot reach them by phone, certified letter, or email
- Copy or scan IDs into medical records for future facial recognition
- Decide if local outreach on websites and apps is right for your county or jurisdiction (nurses, counselors, outreach workers)
