

**Number of Reported Tuberculosis Cases, Rates and Rank  
North Carolina 1980 - 2017**

<b>Year</b>	<b>U.S. Case Rate*</b>	<b>NC TB Cases</b>	<b>NC Case Rate*</b>	<b>NC Rank by Rate^</b>
1980	12.3	1066	18.7	3
1981	11.9	981	16.5	8
1982	11.0	806	13.4	12
1983	10.2	780	12.8	13
1984	9.4	756	12.3	12
1985	9.3	669	10.7	14
1986	9.4	722	11.4	13
1987	9.3	662	10.3	14
1988	9.1	649	10.0	15
1989	9.5	637	9.7	15
1990	10.3	666	10.0	14
1991	10.4	624	9.3	17
1992	10.5	604	8.8	17
1993	9.8	594	8.6	17
1994	9.4	566	8.0	20
1995	8.7	519	7.2	22
1996	8.0	554	7.6	17
1997	7.4	462	6.2	20
1998	6.8	498	6.6	17
1999	6.4	488	6.4	16
2000	5.8	447	5.6	16
2001	5.6	397	4.9	20
2002	5.2	434	5.4	14
2003	5.1	374	4.7	21
2004	4.9	382	4.5	19
2005	4.8	329	3.8	25
2006	4.6	374	4.2	18
2007	4.4	345	3.8	22
2008	4.2	335	3.6	22
2009	3.8	250°	2.7	26
2010	3.6	296	3.1	19
2011	3.4	244	2.6	24
2012	3.2	211	2.2	29
2013	3.0	216	2.2	25
2014	3.0	195	2.0	27
2015	3.0	199°	2.0	26
2016	2.9	219°	2.2	21
2017	2.8	213	2.1	21

\* Cases reported per 100,000 population

° This number was originally reported to CDC as one larger (2009: 251; 2015: 200; 2016: 220). However, in each year it was later determined that one of the cases did not meet criteria.

^ Rank compares North Carolina's TB rates to the other 49 states and the District of Columbia. A ranking of 1 indicates the highest TB rate in the nation; 51 indicates the country's lowest TB rate.
