Mosquito Control Specialists

Date: 9-08-2011

Subject: Aerial mosquito spraying in Dare County

Vector Disease Control International will be conducting a aerial mosquito control spray mission over the Dare County congested areas for the control of vector carrying mosquitoes.

VDCI has a contract with the public works of Dare County to conduct this operation using the pesticide Dibrom EC which is labeled to spray over congested areas. This operation will commence on September 8 2011 at 7:00 PM till 12:00 AM.

The mission will be conducted with two twin engine Aztecs using rotary atomizer to maintain the proper droplet spectrum of 25 to 30 microns. The operation will be flown at an altitude of 300 ft AGL at night. The night time operation will ensure the best kill of the target pest and the minim impact on the non target pest. VDCI sprays this pesticide over 3 million acres a year over the US in any given year.
